

I am opposed to HR 4026 and the NAB petition 04-160 for several reasons. First is the First Amendment issue, and since I am a Satellite Radio subscriber I want full value from my subscription. I also listen to the local radio stations and will continue to do so. The local stations should be able to compete by offering more and varied programming and also be more innovative in order to retain their listening share. That is how things work (or should work) in this country. If we stifle competition, then we all lose.
